# BASEC At a Glance

BASEC Engineering was established in 2018 in Lismore, NSW with project offices located in Gold Coast, Coffs Harbour and Maclean. With our team of experienced professionals, we provide end-to-end project management solutions across various sectors to ensure projects are completed on time, within budget, and to the highest quality standards. BASEC Engineering is an ISO Certified Company for Quality, Occupational Health & Safety and Environmental Management Systems, ensuring your project will be managed to the highest standards.

Our expertise lies in managing complex civil engineering projects on both the client side and as the Principal Contractor such as roads, bridges, water and wastewater, waste, and public infrastructure. We have a proven track record of successfully delivering projects from conception to completion, meeting and exceeding client expectations.

At BASEC Engineering, we adopt a collaborative approach with clients, stakeholders and project teams. We believe in regular communication, transparency and flexibility to ensure that projects are delivered efficiently and effectively. We understand the importance of safety, sustainability, and regulatory compliance in all our projects.

***Our collaboration with our clients is at the core of what we do, as we work together to achieve their project goals and objectives.***

*From project inception to completion, we offer a wide range of services including -*

- Project Management & Coordination
- Feasibility Studies & Conceptual Design
- Planning & Scheduling
- Cost Estimating & Budgeting
- Risk Management & Mitigation
- Contract Management
- Quality Control & Assurance
- Commissioning & Handover
- Construction Management & Supervision
- Stakeholder Management
